

Equipment Used:

- 1 - Our fuels consist of both Coleman white gas and lamp oil. Material Safety Data Sheets (MSDS) for both fuels will be kept onsite and available in advance upon request. We use only approved fuels that will be stored in their retail containers as required by NAFAA safety guidelines.
- 2 - Our fueling station consists of a standard two-walled self-extinguishing fuel container system: one metal inner container with lid and a plastic external container with sealing lid. The location of the fueling station will be determined when we arrive to ensure that it will be in a safe, accessible location clear of foot traffic.
- 3 - We utilize flame-retardant Duvetyne cloth to extinguish burning tools during the performance and these can also be used in the unlikely event of an emergency.
- 4 - During a performance, all performers wear only the appropriate flame resistant clothing, free of loose fabric, tassels or fringes.
- 5 - We inspect all of our performance tools at regular intervals, and prior to all performances ensure that all hardware and Kevlar wicking is secure.

Before the Show:

- 6 - We are fully insured by Specialty Insurance Agency (www.specialtyinsuranceagency.com), and can provide certificates naming your institution as additionally insured upon request. We require at least 48 hours notice to have it faxed to you.
- 7 - Each member of A Different Spin has been performing with fire for over ten years and is well versed in fire safety specific to their performance and adheres strictly to A-V-P (Audience, Venue, Performer) safety priority.
- 8 - If there are any safety personnel at your event, we require a brief meeting with them on or before the day of the show to ensure that any site-specific safety precautions are addressed and met. If a fire marshal and / or head of security would like more details, s/he should contact us directly.
- 9 - If the venue in question is outdoors, weather conditions must be taken into consideration, including but not limited to rain, snow, or high winds. If weather conditions are deemed by either the performers or the customer to be unsafe, A Different Spin will not perform with fire.

As performers of an amazing yet potentially dangerous art, A Different Spin prides itself on safety and that requires absolute cooperation. If you or anyone at your organization has any remaining questions please don't hesitate to ask.
